Samuel Zapolsky

Robotics & A.I.

Experience

Chief Technology Officer | July 2019 – Present
Dextrous Robotics Inc.
Lead technical effort for developing robotic SW & HW on a high-speed manipulation platform for logistics applications.

Research Scientist | Apr 2017 – June 2019
Toyota Research Institute
Cloud Robotics Group
Lead: Hardware & controls team for developing an in-home mobile manipulator robot
Shared Autonomy Group
Planning, controls & hardware for safe teleoperation of a mobile manipulator robot
Stanford University Liaison
Robotics lab PIs: Allison Okamura, Oussama Khatib, Mark Cutkosky, Ken Salisbury

Graduate Research Assistant | Sep 2012 – Feb 2017
The George Washington University
Positronics Lab (Planning, Optimization & Simulation for Robotics)
Washington, DC
Advisor: Evan Drumwright

Research Assistant | July 2012 – Sep 2012
Italian Institute of Technology: Advanced Robotics Department
Dynamic Legged Systems Lab
Genoa, Italy
Advisors: Jonas Buchli & Claudio Semini

Education

Graduate | Sep 2012 – Feb 2017
The George Washington University
The School of Engineering and Applied Sciences
Ph.D. Computer Science: Robotics and A.I.
Advisor: Evan Drumwright

Undergraduate | Aug 2008 – May 2012
The George Washington University
The Elliott School of International Affairs
Major: International Affairs, Concentration: International Economics
Major: Economics
Minor: Computer Science

Skills

Programming, Scripting & Other Languages
- C/C++ (primary)
- Java
- Python
- Bash
- LaTeX

Programs
- MIT's Drake Simulator
- GDB & LLDB
- ROS & Gazebo
- MATLAB

Key Publications

Simulation Based Fault Detection and Design Modification for Highly Dynamic Robotic Systems
Samuel Zapolsky
The George Washington University, ProQuest Dissertations Publishing
(2017). [PDF]

Inverse Dynamics with Rigid Contact and Friction
Samuel Zapolsky and Evan M. Drumwright
Auton Robot (2016). doi:10.1007/s10514-016-9608-7 [PDF]
